

Our Server Synology

Every member of the team must have an account on our server Synology

→ To create an account see Gilles

→ To access to your homedir and files :

<https://ama.liglab.fr:5001> or

<sftp://ama.liglab.fr:22>

from the lab.

-> To give access to your web home page you have to create a folder "www" at the root of your account, and then put your pages (html, css, ...) in this folder.

Your web address is :

http://ama.liglab.fr/~your_login_name

Server Synology : ama.liglab.fr

Synology server integrates a web server.

On this web server : our Web Site : <http://ama.liglab.fr>

Based on Wordpress

a "member" page --> ?

In this page it is possible to add a link on your home page

2 possibilities :

1- You have already an home page and you just want to add a link on it from our web site --> just give me the url

2- You want to create a new web page and put it on our web Server with the address : http://ama.liglab.fr/~your_login_name

If you want to create your home page and put it on the web

1- create html, css, php ?

2- put them in the www folder of your synology account

3- ask me (or massih or Gilles or Adrien or ...) to make a link on it from our member page

That's all...

To create your html css files

1- Use your favorite tools

2- Or just fill the generic home page
(sent by email Tuesday)

- Built with Wordpress

- Use ama's web style --> ?

- Responsive design

- Pure html and css

- You just have to adapt the content, the menu--> ?
